
Overview

At Behaviour+ we have a variety of different funding options that are available to assist with the costs associated with accessing and receiving therapy supports and services for your child and family. This list is not exhaustive, but is intended to provide an overview of some of the available options for the payment of services. These can be discussed further with Behaviour+ prior to commencing services.

National Disability Insurance Scheme (NDIS)

The NDIS is a national program designed to provide financial support for therapy and other necessary supports for people with a disability. There is a formal process required to access the NDIS. To commence this process, participants are required to submit an 'Access Request' to determine their eligibility. If eligible, the NDIS will work with you to make a plan which outlines the supports and services required to meet you or your child's goals. You will then receive a plan outlining a monetary amount which can be used to pay for required supports and services. This plan is typically reviewed on an annual basis.

For more information visit the website: www.ndis.gov.au or call on 1800 800 110.

Behaviour+ is a NDIS registered specialist disability provider. Under the NDIS we are registered to provide early intervention services, therapy services, behaviour support and Plan Management under the following Capacity Building categories:

- *Improved Daily Living*

This support category allows for the provision of assessment, training, and therapeutic supports to assist the development of, or to increase, participants skills and their capacity for independence and community participation. These include capacity building supports for early childhood intervention (under 7 years), and therapeutic supports for other participants (over 7 years).

- *Improved Relationships*

This support category allows for the provision of specialised assessment for people with complex or unclear needs, requiring long term or intensive supports to address behaviours of concern. These include specialist behavioural intervention supports and behaviour management planning and training.

- *Improved Life Choices*

This support category allows for the provision of managing and monitoring budgets over the course of the plan. The plan management provider manages the NDIS claims on your behalf and pays the service provider for the services that have been delivered.

Medicare Rebates

If your child is referred by an appropriate medical practitioner, some Allied Health therapy services may be eligible for a Medicare rebate. To find out more, Behaviour+ recommend you speak to your GP, or medical practitioner. If you would like to claim a Medicare rebate on any services at Behaviour+, please let us know prior to commencing services.

Chronic Disease Management (CDM) & Team Care Arrangements

People with a chronic medical condition who require ongoing care from a multidisciplinary team, may be able to access a Medicare rebate on up to 5 therapy sessions per calendar year.

Better Access to Mental Health Care

Children with a diagnosed mental disorder may be able to access a Medicare rebate for up to 10 individual therapy sessions, and up to 10 group therapy sessions per calendar year.

Private Health Insurance

Families with 'extras cover' as part of their private health insurance may be able to claim a rebate on certain therapy services. To find out more, Behaviour+ recommend you speak to your insurer. If you would like to claim a rebate using your private health insurance on any services at Behaviour+, please let us know prior to commencing services.

Claiming rebates

Medicare and private health insurance rebates generally only cover part of the cost of services. Behaviour+ is only able to provide a receipt suitable for claiming private health insurance or Medicare rebates once services have been paid in full. Some services may be eligible for both private health insurance and Medicare rebate; you will need to decide which rebate to claim as you are only able to claim one rebate on any particular service.

Fee for service

Behaviour+ offers private therapy services. Our schedule of fees is available upon request. All fees associated with private services will be discussed with you before commencing services. A detailed tax invoice will be provided.
